

给定一个二叉树,返回该二叉树层序遍历的结果,(从左到右,一层一层地遍历)

给定的二叉树是{3,9,20,#,#,15,7},

该二叉树层序遍历的结果是 [3], [9,20], [15,7]

```
核心代码模式
① Java
```

```
18 ····public · ArrayList < ArrayList < Integer >>> levelOrder · (TreeNode · root) · {
19 .....//write-code-here
20 ....if(root==null){
26 ····public·void·dfs(TreeNode·node,int·level){
30 ······ArrayList<Integer>·list=res.get(level);
31 ·····list.add(node.val);
36 ·····dfs(node.right,level+1);
```
