

```
核心代码模式
① Java
  14 ····List<Integer> post=new ArrayList<>();
  15 ····
16 ····public·int[][]·threeOrders·(TreeNode·root)·{
17 ·····//·write·code·here
  21 ....List<List<Integer>>> list=new-ArrayList<>();
  25 ·····list.add(pre);
  27 ·····list.add(post);
   28 ·····int[][]·res=new·int[list.size()][list.get(0).size()];
   29 · · · · · · for(int · i=0; i < res.length; i++){
   30 ·····for(int·j=0;j<res[0].length;j++){
  31 · · · · res[i][j]=list.get(i).get(j);
   36 ····public·void·first(TreeNode·root){
  38 ....return;

39 .....}

40 .....pre.add(root.val);

41 .....first(root.left);
   45 ····public·void·second(TreeNode·root){
  49 .....second(root.left);
50 .....in.add(root.val);
51 ....second(root.right);
  53 ····public·void·third(TreeNode·root){
  57 ·····third(root.left);
  58 ....third(root.right);
  59 ·····post.add(root.val);
```
